

FOR IMMEDIATE RELEASE

HAI HELI-EXPO 2020, January 27-30, Anaheim, CA - BOOTH 16

Ozark, AL, January 7, 2020 - CATI Training Systems, (CATI), a leader in innovative Image Generator and Simulation Solutions is pleased to announce we will be exhibiting with SGB Enterprises at the Helicopter Association International, **HELI-EXPO 2020** January 27-30. HAI HELI-EXPO is the world's largest helicopter exhibition and will take place this year in Anaheim, CA. Come see why when performance really matters, CATI X-IG® is the best choice for a high-resolution, out-the-window visual scene, providing the trainee a life-like experience in a virtual reality environment. Please visit us at **Booth #16**. Walk-ins are welcome or to schedule an appointment for a demonstration and discussions, please contact Vincent Hill, Vice President of Business Development.

About SGB Enterprises Inc.

For more than twenty-five years, **SGB Enterprises**, Inc. has combined product design excellence and production expertise to serve broad customer base for both military and commercial simulation training sectors. **SGB** is a systems integrator that designs and manufactures procedural trainers, flight training devices, flight simulators, maintenance trainers, and all the avionics and control components that make up the cockpits of those systems. **SGB's** vertical integration and control over core processes allows **SGB** to maintain best value training solutions while achieving the highest level of fidelity and reliability required to train today's aviators.

About CATI Training Systems

CATI is headquartered in Ozark, AL, was initially incorporated in 1992 as Carmel Applied Technologies, Inc. CATI entered the competitive visual system providers market in 1997 with an OpenGL® Silicon Graphics (SGI) based image generator, X-IG®. **CATI** Training Systems continues to provide engineering services and products for government, commercial, and civilian organizations around the world.

Today, **CATI's** image generator solutions and UAS Training devices are all PC-based. **CATI's** image generators are specifically designed around industry-standard OpenGL®, a high-performance graphics Application Programming Interface (API), and OpenFlight®, the 3D standard format for the visual simulation industry. The open design of X-IG® and X-Gen®, run on 100% Commercial-Off-the-Shelf (COTS) PC-based hardware and software. This allows us to offer high-performance, versatile capabilities for various types of training, testing, and experimentation. X-IG® and its suite of associated tools and programs offer superior image fidelity, realism, and ease of integration with most simulation systems.

Every system **CATI** delivers provides unmatched ease of use, open architecture, COTS tools, and flexible interface options as well as low acquisition, overhead, and life cycle support costs.
