

FOR IMMEDIATE RELEASE

CATI Training Systems CATI to Attend I/ITSEC 2018

Ozark, AL., November 13, 2018 - CATI Training Systems, please visit CATI Training Systems at I/ITSEC 2018, November 26 -29 2018 in the South Concourse at the Orange County Convention Center in Orlando, Florida. As part of the CATI Training Systems relaunch, CATI will be showing our latest solutions for training, simulation, synthetic environments and virtual reality featuring X-IG® Version 4.2 and our Virtual Reality (VR) helmet mounted display system. Please join us in booth #1958. You can also see CATI X-IG® in action at the following locations: 3D-Perception (booth 871), Digital Projection Inc. (booth 1908), Canon (booth 2401), SA Photonics (booth 620), and General Dynamics Information Technology (booth 685). To schedule a meeting or demonstration, please contact Vincent Hill.

About CATI Training Systems

CATI Training Systems, headquartered in Ozark, AL., was initially incorporated in 1992 as Carmel Applied Technologies, Inc. CATI entered the competitive visual system providers market in 1997 with an OpenGL® Silicon Graphics Incorporated (SGI) based image generator, X-IG®. CATI Training Systems' team continues to provide engineering services and products for government, commercial and civilian organizations around the world.

Today, CATI's image generator solutions and UAS Training devices are all PC-based. CATI's image generators are specifically designed around industry-standard OpenGL®, a high-performance graphics Application Programming Interface (API), and OpenFlight®, the 3D standard format for the visual simulation industry. The open design of X-IG® and X-Gen®, run on 100% Commercial-Off-the-Shelf (COTS) PC-based hardware and software. This allows us to offer high-performance, versatile capabilities for various types of training, testing and experimentation. X-IG® and its suite of associated tools and programs offer superior image fidelity, realism, and ease of integration with most simulation systems.

Every system CATI has delivered provides unmatched user friendliness, open architecture, COTS tools, and flexible interface options, all designed for ease of use, and low acquisition, overhead, and life cycle support costs.
