

FOR IMMEDIATE RELEASE

FAA certifies Falcon 20 Level C Simulator with CATI's X-100™

Daleville, Alabama – December 11, 2009

CATI Training Systems has successfully integrated its X-100™ commercial image generator on the Falcon 20 full flight simulator at Simcom Training Center. A repository of certified geo-specific image based airport models has also been delivered to support Simcom's training program. **CATI's** X-100™ is the ideal choice for the commercial training market. X-100™ delivers high-end performance with accurate, realistic, and dynamic scene content that addresses FAA/JAA regulatory requirements. **CATI** has also delivered its Environment Modeling Editor (EME™) software which will allow Simcom to rapidly enhance the database with 3D features.

About CATI Training Systems

CATI Training Systems is a full service modeling and simulation company that designs and develops advanced visual image generation systems with high-fidelity visual simulation terrain databases for military, commercial and UAV simulators. **CATI** Training System's image generators are specifically designed around industry-standard OpenGL™, a high performance graphics Application Programming Interface (API) and OpenFlight™, the 3D standard format for the visual simulation industry.

X-IG™, X-100™ and X-TUAS™ image generators run on 100% COTS PC-based hardware and software, including Windows and Linux operating systems. **CATI's** database and modeling production facility has completed and delivered 23 correlated databases comprising almost 300 million square kilometers of training capable virtual terrain. **CATI** Terrain Databases have validated models for EO, IR and NVS environments. Every system **CATI** has delivered provides unmatched user friendliness, open architecture, COTS tools and flexible interface options, all designed for ease of use, and low acquisition, overhead and life cycle support costs.
