FOR IMMEDIATE RELEASE
CATI to Exhibit at I/ITSEC-2023 – BOOTH 2572

Ozark, AL., November 14, 2023 - CATI Training Systems, (CATI), a leader in innovative Image Generator and Simulation Solutions is pleased to announce we will be exhibiting at the 2023 Interservice/ Industry Training, Simulation and Education Conference (I/ITSEC), located at the Orange County Convention Center, Olando, FL between 27-30 November 2023. I/ITSEC is the world's largest modeling, simulation, and training event of the year, held annually at the Orange County Convention Center, Orlando, Florida. Featured in our booth will be a single-seat CAPTE-VCS+ UH-60M FTD demonstrating both Out-the-Window and Blended Reality visual display using the Varjo XR-3 HMD. Additionally, CATI will showcase our latest solutions for training, simulation, synthetic environments, and virtual reality featuring X-IG® Version 5.0. Please come see us at **Booth #2572**. Walk-ins welcome or to schedule an appointment for a demonstration and discussions, please contact Vincent Hill, Vice President of Business Development.

About CATI Training Systems

CATI is headquartered in Ozark, AL, and was initially incorporated in 1992 as Carmel Applied Technologies, Inc. CATI entered the competitive visual system providers market in 1997 with an OpenGL® Silicon Graphics (SGI) based image generator, X–IG®. **CATI** Training Systems continues to provide engineering services and products for government, commercial, and civilian organizations around the world.

Today, **CATI's** image generator solutions and UAS Training devices are all PC–based. **CATI's** image generators are specifically designed around industry-standard OpenGL®, a high-performance graphics Application Programming Interface (API), and OpenFlight®, the 3D standard format for the visual simulation industry. The open design of X–IG® and X–Gen® run on 100% Commercial-Off-the-Shelf (COTS) PC–based hardware and software. This allows us to offer high-performance, versatile capabilities for various types of training, testing, and experimentation. X-IG® and its suite of associated tools and programs offer superior image fidelity, realism, and ease of integration with most simulation systems.

Every system **CATI** delivers provides unmatched ease of use, open architecture, COTS tools, and flexible interface options as well as low acquisition, overhead, and life cycle support costs.
