

FOR IMMEDIATE RELEASE

CATI Training Systems Delivers X-IG® Builder License

Ozark, AL, May 25, 2020 - CATI Training Systems was recently awarded and delivered the second X-IG® Builder Software or Database Generation System (DBGS) for the Black Hawk Aircrew Trainer (“**the BAT**”) Project. The X-IG® Builder is the conversion tool used to convert standard OpenFlight® geometry, terrain, and models into efficient data sets for the X-IG® Image Generator runtime. Utilizing advanced conversion techniques, data compression, and organization allows end-users to publish high-fidelity detailed visualization environments for their training environments. BAT is an immersive home-station UH-60M Flight Training Device (FTD), comprised of a state-of-the-art collimated visual system being fielded now by the U.S. Army.

About CATI Training Systems

CATI is headquartered in Ozark, AL, was initially incorporated in 1992 as Carmel Applied Technologies, Inc. CATI entered the competitive visual system providers market in 1997 with an OpenGL® Silicon Graphics (SGI) based image generator, X-IG®. CATI Training Systems continues to provide engineering services and products for government, commercial, and civilian organizations around the world.

Today, CATI's image generator solutions and UAS Training devices are all PC-based. CATI's image generators are specifically designed around industry-standard OpenGL®, a high-performance graphics Application Programming Interface (API), and OpenFlight®, the 3D standard format for the visual simulation industry. The open design of X-IG® and X-Gen®, run on 100% Commercial-Off-the-Shelf (COTS) PC-based hardware and software. This allows us to offer high-performance, versatile capabilities for various types of training, testing, and experimentation. X-IG® and its suite of associated tools and programs offer superior image fidelity, realism, and ease of integration with most simulation systems.

Every system CATI delivers provides unmatched ease of use, open architecture, COTS tools, and flexible interface options as well as low acquisition, overhead, and life cycle support costs.
