FOR IMMEDIATE RELEASE
HAI HELI-EXPO 2022, March 8-10, Dallas, TX – BOOTH S-16

Ozark, AL., February 28, 2022 - **CATI** Training Systems, (CATI), a leader in innovative Image Generator and Simulation Solutions is pleased to announce we will be exhibiting with **SGB Enterprises** Inc., the manufacturer of the small footprint, mobile, cost effective CAPT flight simulation system, at the Helicopter Association International, **HELI-EXPO 2022** March 8-10. HAI HELI-EXPO is the world's largest helicopter exhibition and will take place this year in Dallas, TX. Featured in our booth will be **SGB's** UH-60A/L CAPTE-VCS+ Flight Training Device (FTD) and a single seat CAPTE-VCS+ UH-60M FTD featuring both Out-the-Window and Blended Reality visual displays. Please visit us at **Booth #S-16** and go for a virtual flight. Walk-ins are welcome or to schedule an appointment for a demonstration and discussions, please contact Vincent Hill, Vice President of Business Development.

About SGB Enterprises Inc.

For more than twenty-seven years, **SGB Enterprises**, Inc. has combined product design excellence and production expertise to serve a broad customer base for both military and commercial simulation training sectors. **SGB** is a systems integrator that designs and manufactures procedural trainers, flight training devices, flight simulators, maintenance trainers, and all the simulated avionics and control components that make up the cockpits. Our training solutions represent the right mix of cost, fidelity and deployabity. To date **SGB** has fielded over 150 CAPT systems worldwide. **SGB's** vertical integration and control over core processes allows **SGB** to maintain best value training solutions while achieving the highest level of fidelity and reliability required to train today's aviators.

About CATI Training Systems

CATI is headquartered in Ozark, AL, was initially incorporated in 1992 as Carmel Applied Technologies, Inc. CATI entered the competitive visual system providers market in 1997 with an OpenGL® Silicon Graphics (SGI) based image generator, X–IG®. **CATI** Training Systems continues to provide engineering services and products for government, commercial, and civilian organizations around the world.

Today, **CATI's** image generator solutions and UAS Training devices are all PC–based. **CATI's** image generators are specifically designed around industry-standard OpenGL®, a high-performance graphics Application Programming Interface (API), and OpenFlight®, the 3D standard format for the visual simulation industry. The open design of X–IG® and X–Gen®, run on 100% Commercial-Off-the-Shelf (COTS) PC–based hardware and software. This allows us to offer high-performance, versatile capabilities for various types of training, testing, and experimentation. X-IG® and its suite of associated tools and programs offer superior image fidelity, realism, and ease of integration with most simulation systems.

Every system **CATI** delivers provides unmatched ease of use, open architecture, COTS tools, and flexible interface options as well as low acquisition, overhead, and life cycle support costs.
