FOR IMMEDIATE RELEASE
CATI Training Systems Delivers X-IG® to China

Ozark, AL., May 29, 2019 - **CATI** Training Systems (CATI), a leader in innovative Image Generator and Simulation Solutions delivered two channels of X-IG® Image Generator Runtime licenses to Sea Stars Co., Ltd., a China based company. This initial delivery of X-IG® to Sea Stars paves the way for CATI to enter the rapidly expanding Asian simulation and training market.

About Sea Stars Co., Ltd.

Sea Stars is a well-established enterprise engaged in the application and development of simulation technology in China. They are a first-class technical strength with rich industry experience in simulation and virtual application fields such as virtual manufacturing, training simulators, simulation of electronic systems, and simulation of civilian technology venues. Sea Stars is homebased out of the China International Science & Technology Exhibition Center in Beijing China.

About CATI Training Systems

CATI Training Systems, headquartered in Ozark, AL, was initially incorporated in 1992 as Carmel Applied Technologies, Inc. **CATI** entered the competitive visual system providers market in 1997 with an OpenGL® Silicon Graphics Incorporated (SGI) based image generator, X–IG®. **CATI** Training Systems continues to provide engineering services and products for government, commercial, and civilian organizations around the world.

Today, **CATI**'s image generator solutions and UAS Training devices are all PC–based. **CATI**'s image generators are specifically designed around industry-standard OpenGL®, a high-performance graphics Application Programming Interface (API), and OpenFlight®, the 3D standard format for the visual simulation industry. The open design of X–IG® and X–Gen®, run on 100% Commercial-Off-the-Shelf (COTS) PC–based hardware and software. This allows us to offer high-performance, versatile capabilities for various types of training, testing, and experimentation. X-IG® and its suite of associated tools and programs offer superior image fidelity, realism, and ease of integration with most simulation systems.

Every system **CATI** delivers provides unmatched ease of use, open architecture, COTS tools, and flexible interface options as well as low acquisition, overhead, and life cycle support costs.

Every system **CATI** delivers provides unmatched ease of use, open architecture, COTS tools, and flexible interface options as well as low acquisition, overhead, and life cycle support costs.
